產品更新公告：

為優化 PET 厚壁瓶印刷品質控管並提升印刷定位的準確度，除了瓶底的定位點設計，更增加了在牙口位置的定位點設計，雙重定位的設計讓產品的印刷品質更加提升。**此新的牙口設計變更並不會影響產品功能性及配件的搭配效果或密合度。**於 2017 年 7 月份開始生產的部分產品將優先更換成新的牙口設計，舊版本待庫存使用完後就不再生產及供應。如需詳細資料及樣品，請與我們的聯繫窗口聯絡。謝謝

俊伸團隊

PRODUCT UPDATE INFORMATION

In EPOPACK's PET heavy wall bottle product line, each bottle has the first printing position pin on the bottom. In order to improve the quality of printing production, we created and designed a second printing position pin on the bottle neck area. This design provides better support for the printing machine to hold the bottles steady. **This new design will not impact the bottle's functionality and the seal function of the matching the attachments** (such as pumps, sprayers, droppers and caps). We will start producing the new version bottles in July 2017 and when the current version bottle stock run out, it will be discontinued. If you need any further information or samples, please contact our team. Thank you.
